ABOUT ADVANCIS

Since 1994 Advancis provides the security, safety and building management industry with its highly flexible and open architecture command & control system, WinGuard PSIM.

Advancis is committed to open architecture and vendor neutrality since its foundation. Our command & control technologies provide clients with freedom of choice and the ability to unify disparate system brands of all types into a single management application that offers enhanced security and greater system efficiency. WinGuard also reduces operational costs and provides a rapid return on investment.

Advancis is a constant innovator with regular product improvements and developments for the global PSIM market.

TECHNOLOGY PARTNER PROGRAM

We work in close partnership with an ever growing community of technology partners around the world, with currently over 400 integrations to best of breed vendors.

 With this close cooperation we can achieve a deep integration of our technology partners' systems and a comprehensive functional scope. Regular communications and meetings with the partners technical personnel ensures that our driver interfaces are always state of the art.

Advancis employs highly skilled and qualified employees who provide excellent support to fulfill the ongoing needs of our joint customers. Our joint value solution with partners generates greater market awareness and cross selling potential.

PREMIUM PARTNER - TELECOM BEHNKE

Based in Saarland/Germany, the Behnke Group is one of the leading providers of industrial door stations and emergency phones for elevators on the German and European market. Tradition and constant innovation have shaped the company philosophy since 1980. Behnke door stations as well as emergency call stations are developed according to the highest standards and our devices are characterised by quality, reliability, longevity and flexibility, making them easy to integrate into phone systems and data networks.

Our VoIP technology stands out due to its flexible design. We provide modular and custom-made products that are perfectly adapted to specific customer requirements, both in the industrial and private business sector.

Behnke products are characterised by the quality designation „Made in Germany".

"

Open platform PSIM systems unify entire technical infrastructures of buildings and guide operators through the required actions for a quick and secure resolution of the situation.

When coupled with WinGuard PSIM from Advancis, Behnke audio systems provide a reliable control room solution that is particularly appreciated in high security & critical infrastructure projects such as prisons, banking, public transport hubs, healthcare and traffic management. The combined solution simplifies the situational analysis of all systems in real time and allow operators to quickly understand what is happening and how to react.

WinGuard directly monitors & controls incoming calls & events from Behnke door, emergency call stations and elevator emergency telephones.

JOINT SOLUTION

The integration of Behnke products into the Advancis PSIM system WinGuard ensures optimal control centre management with increased functionality and operational reliability.
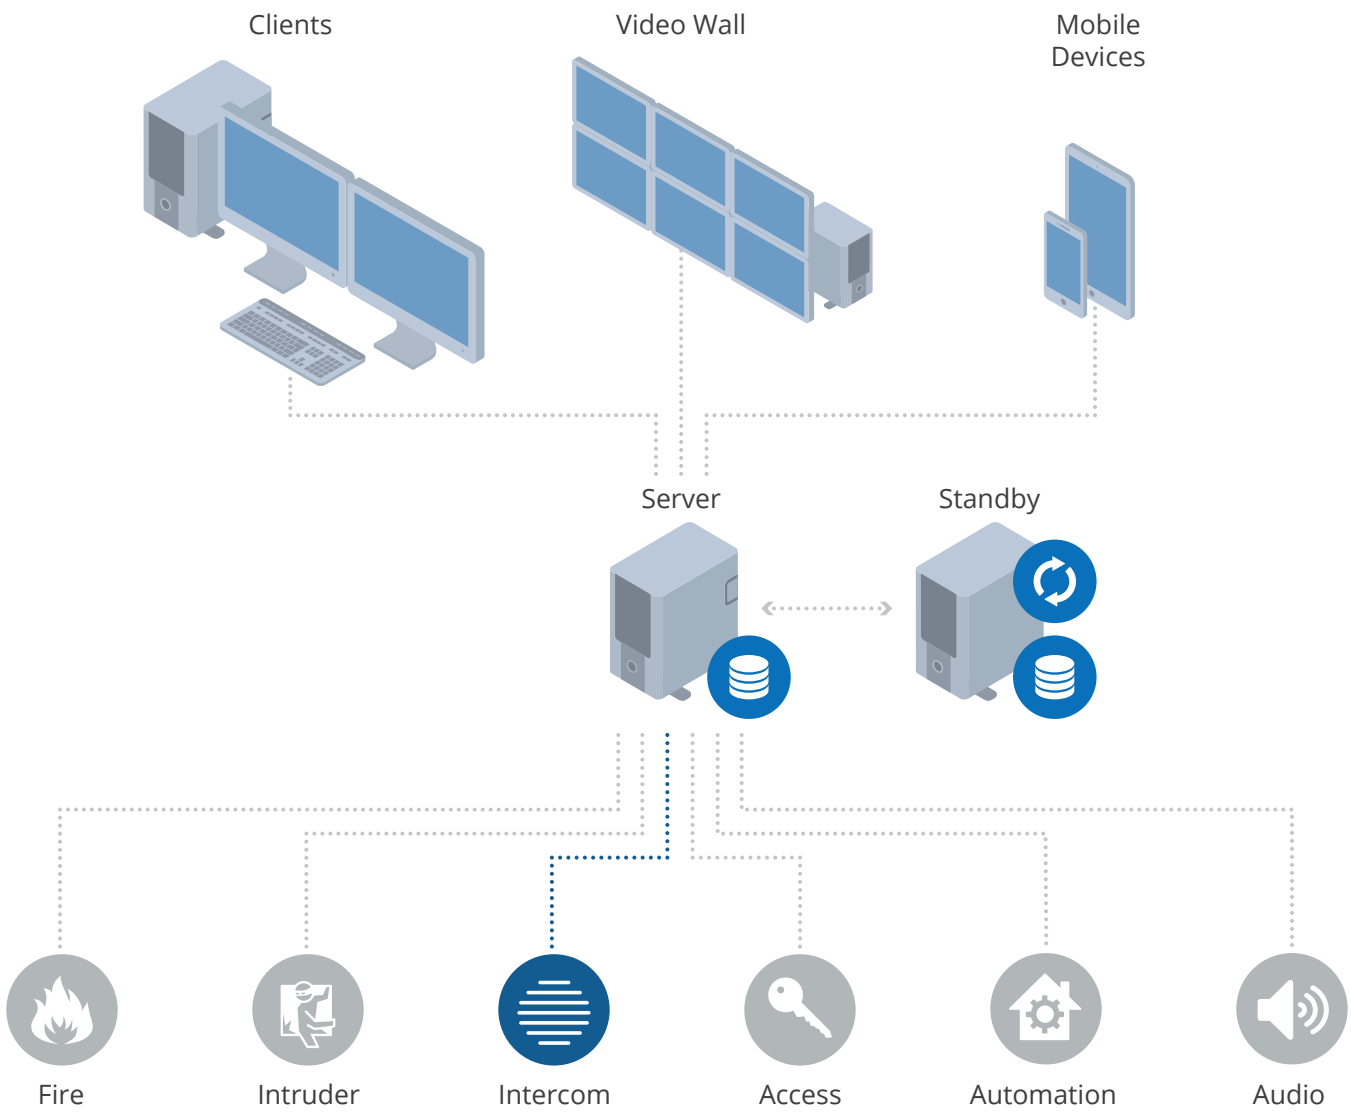

Technological requirements change over time and therefore products have to be continuously adapted. Both Advancis and Behnke offer highly flexible and modular solutions that meet perfectly current and future requirements.

winguard
always retain control

- ✔ Open platform solution for complete infrastructure integration and management

- ✔ Flexible user interfaces that adapt to customer requirements

- ✔ Guided process instructions support the user in event processing

- ✔ Reports offer a quick overview of relevant key information

- ✔ Mobile apps provide insight to all incidents and operations at any time

- ✔ Scalability from a single workstation to multiple control centres with redundancy and failover

Telecom Behnke

- ✔ 200+ phonebook entries & 100 speed dials with 8 optional direct call buttons & 2 additional buttons (i-button and alarm input).

- ✔ 9 configurable voice announcements are recordable into the intercom or uploaded.

- ✔ The "hands-free" function takes place in full duplex and with echo suppression and provides optimum voice quality.

- ✔ Integrated SIP PoE switch with VLAN support. This means that other PoE-capable terminal devices can also be supplied with electricity

- ✔ SIP intercoms are set up automatically using auto provisioning. Subscribers or users do not even have to be in the same IP network.
